Management's Discussion and Analysis

(Unaudited)

June 30, 2026

Management's Discussion and Analysis

Highlights from 2025-26

- University grants and scholarships were awarded to 61.1% of the undergraduates with the average institutional grant or scholarship award at $69,270. In 2015-16, the corresponding figures were 48.6% of undergraduates with average institutional award of $41,340.
- Endowment (including Trusts Held by Others) per Student finished the year at $1,091,463. At June 30, 2016, this value was $678,565. In other words, this increase in value of 60.8% has been captured over the past decade even with the endowment distributing between 4% and 5% of its value annually.
- The university invested $28.6 million into capital projects in 2025-26. Among the major projects that were advanced were Childress Hall (which opened in August 2025), the Lindley Center for Student Health and Wellness (opened in August 2025) and Phase 1 of the Utility Infrastructure project to shift from steam to low-temperature hot water distribution (completed in summer of 2026).
- The university funded 740 students for the "Full W&L Experience" in 2025-26 with a total level of support in excess of $3.4 million. Students benefitted from support for research, internships, and study away opportunities as part of this strategic initiative.
- New gifts, pledges and estate commitments totaled $84.8 million in 2025-26, the third largest year in giving in over the university's history. The year was highlighted by the W&L Fund shattering its previous best result of $10.9 million with an $11.7 million outcome.
- With distributions of $20.9 million in 2025-26, cumulative gifts and distributions directly from her and through the Lettie Pate Evans Restricted Fund and Lettie Pate Evans Whitehead Foundation stand in excess of $330 million showing the power of compounding. The gift that represented W&L's original interest in the L.P. Evans Restricted Fund was valued at just over $5 million at the time of her death. At June 30, 2026, the value of the interest stood at $767.8 million, an increase of $94 million over the previous year.

Revenues Rebound amid continued Expense Growth

2025-26 showed a rebound in revenue growth as net student fees, endowment payout, distributions from trusts held by others and contributions yielded a 7% increase in operating revenues without donor restrictions and 24% overall when compared to the prior year. Endowment payout increased by $9.9 million, distributions from trusts held by others climbed by $1.0 million, and gifts and grants increased by $39.9 million, with the majority of the increase restricted to capital projects.

Expenses climbed by $10.6 million, or 4.7% over the prior year result. From a functional standpoint, growth in Instruction and Student Services led the way with them being up 5.8% and 6.7%, respectively. Compensation which represents the largest expenditure at the university at 60% of expenses grew by 4.5%. Supplies and services increased by $3.67 million or 6.9% as the impact of inflation, especially related to utilities, repairs and maintenance and entertainment drove spending higher.

With revenues growing faster than expenses the university experienced an operating surplus of $39.8 million, with that surplus being generated through gifts with donor restrictions. In response to the weakening of operating results over the last few years led the university administration to put in place certain expense controls for 2025-26 and beyond with the expectation of improving the operating results, especially as measured under funds without donor restrictions.

With the three fiscal years of 2022 through 2024 yielding a cumulative return on endowment of just 0.1%, investment returns have rebounded the past two years with a return of 9.4% in 2024-25 and 16.8% in 2025-26. These returns bode well for future growth in

endowment payout under the hybrid formula established by the Board of Trustees in 2025. Based on modeling of the past, this new formula should yield more predictable and steadier long-term growth in endowment payout over time.

With the strong return environment as well as philanthropic support, the internal endowment grew by $200 million in in 2025-26, putting it at $1.676 billion. Likewise, we saw an increase in the value of Trusts Held by Others of $101.5 million from $716.3 million to $817.9 million reflecting the strong public equity market returns. These when combined with the reduction in long-term debt led to net assets increasing by $302 million to $2.857 billion This is the second year in a row in which net assets have grown in excess of 10%.

This growth in the university's overall balance sheet strength, combined with the continued focus on the strategic plan and the accompanying capital campaign, positions the campus well within the higher education industry. The university continues to recruit the very best students and faculty while providing an environment in which we not only see students succeed but thrive. Today we stand with robust resources and great opportunities to continue to strengthen the university both financially and in its ability to better provide students an incredible array of opportunities to prepare them for their responsibilities in being societal leaders following graduation.

Assets

Washington and Lee University experienced a 10.2% increase in total assets over the past year. From $2.892 billion as of June 30, 2025, the University's assets rose to $3.186 billion as of June 30, 2026. The increase was driven by the increase in investments (primarily endowment) and value of Trusts Held by Others. Increases in Right-of-Use assets and Land Buildings and Equipment offset decreases in Bond Proceeds and Contributions Receivable. Total assets have grown by $1.238 billion, or 63.5%, over the last decade. The major asset categories for the university are presented in Figure 1.

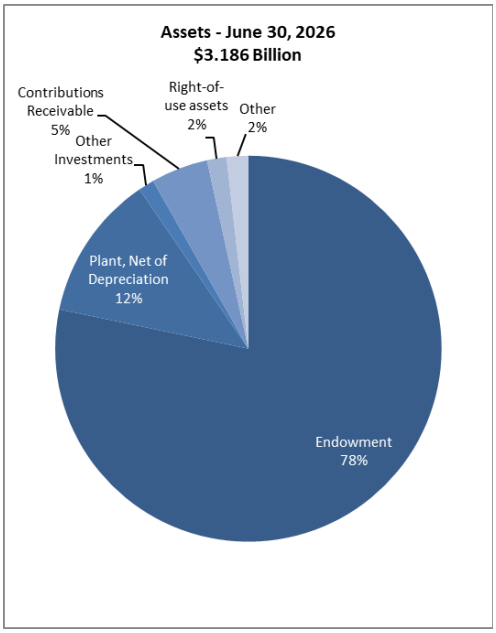

Figure 1

Endowment: Our endowment is comprised of two elements: gifts to the university held in the investment pool and Trusts Held by Others.

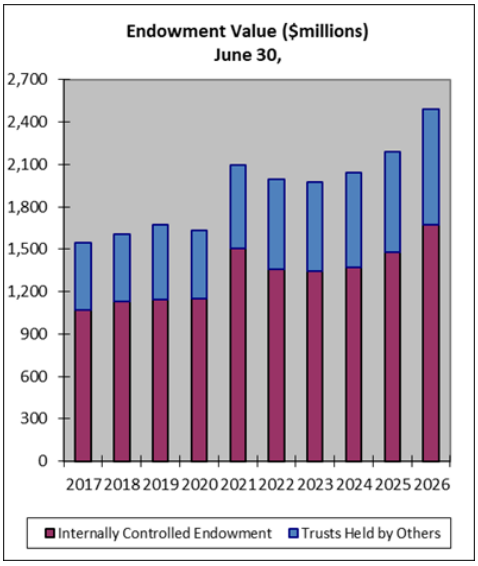

Figure 2

The University's aggregate endowment grew from $2.188 billion as of June 30, 2025 to $2.494 billion as of

June 30, 2026. This establishes a new high watermark for the endowment eclipsing the value as of June 30, 2025. (See Figure 2).

Investment returns for the internally managed endowment were a positive 16.8% in 2025-26. This return coupled with strong gift streams into the endowment more than offset the allocation from endowment for operating support of $80.8 million. The value of the endowment managed by the university grew from $1.476 billion at June 30, 2025 to $1.676 billion at June 30, 2026. The endowment benefitted from new gifts and pledge payments of $43.7 million over the year. This represents the fourth largest level of gift additions to the endowment in three decades.

The market value of Trusts Held by Others saw a marked increase over the year of 14.2% to $817.9 million. The distributions from the thirty-four trusts that the university benefits from grew by $1.0 million to $22.1 million in 2025-26. The Lettie Pate Evans Restricted Fund Trust accounted for $20.9 million of this amount.

Physical Facilities: The university's physical facilities represent the second largest financial investment. Unlike the endowment, the university's physical plant does not appreciate over time but requires constant upkeep and preservation. At the same time, the investment in facilities is necessary to continue to create stimulating learning and social environments for our students and faculty.

During the 2025-26 year, the university opened two new facilities: Childress Hall and the Lindley Center for Student Health and Wellness. The former was the first all new academic facility built since the Ruscio Center for Global Learning in 2015, and the latter allowed us to bring all of student health and counseling services under a single roof in an up to date and state of the art facility. In addition, over the summer of 2026, Phase1 of the Utility Infrastructure project that will allow the university to move closer to carbon neutral in the coming years was completed. This project will provide greater energy efficiency across the campus as future phases are completed.

As we look ahead, the current strategic plan includes five other major capital projects to be completed over the next decade. These include the renovation of Huntley Hall; Founders Hall which broke ground over the summer of 2026; a Museum for Institutional History; the expansion and renovation of the Science Center complex; and a Softball Field Complex. Funding for these projects will be through a combination of fundraising, operating allocations and new debt, with fundraising being the most significant component.

Contributions Receivable: Many significant gifts to the University are structured to be paid in over a period of time (typically no more than five years). These commitments become Contributions Receivable from an accounting perspective. As of June 30, 2026, contributions receivable was valued at $152.0 million. This is down from $191.1 million at June 30, 2025, reflecting numerous pledge payments. It is worth noting that while Contributions Receivable declined, new gifts, pledges and estate commitments for the 2026 year were $84.8 million, the third highest single year total in the university's history. As we enter the final year of the capital campaign, gifts and pledges totaled $628 million toward the $650 million goal.

Right-of-use Assets: These represent the right to use certain underlying assets for a term as set forward in an operating lease (there is an offsetting liability noted below). The bulk of these are real estate leases for properties throughout Lexington with the majority of those slated to expire in 2050.

Other Investments: The last major asset within the university's financial structure is categorized as "Other Investments." These are primarily split interest arrangements by which a donor gives the university a sum of money to invest and manage. The donor receives an income interest from these investments for a specified period of time after which Washington and Lee receives the remainder of the invested funds to support university operations. These other investments

totaled $49.9 million at the end of this most recent fiscal year, down from $52.3 million at the end of fiscal year 2025. The decrease reflects the combination distributions to beneficiaries netted by new additions and market return. In addition, the university holds $700 thousand of operating funds within investments.

Liabilities

On the other side of the ledger, the University has liabilities totaling $329.6 million. Four types of liabilities comprise 96% of this total: debt, future annuity payments, operating lease liabilities and postretirement benefits. (See Fig. 3)

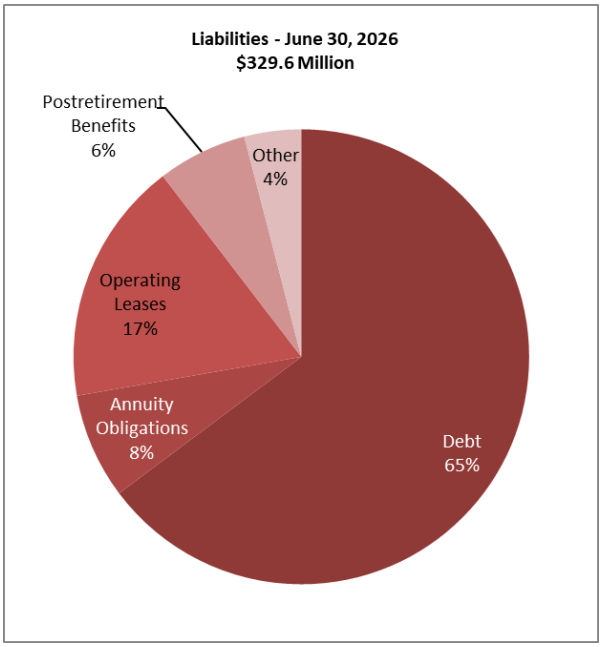

Figure 3

Debt: Washington and Lee University's largest liability is long-term debt that has been incurred over the years to support capital building projects. Debt at the University as of June 30, 2026 stands at $213.4 million. Over the past year, the University made $7.05 million of payments toward principal and $9.06 million in interest payments. Total debt is composed of seven different instruments, with five being tax-exempt issues through either the Virginia College Building Authority or the Lexington City Industrial Development Authority. Taxable debt represents 29.5% of the total outstanding debt. Of the outstanding debt at June 30, 2025, 93.0% is fixed rate and 7.0% is variable rate debt. Maturities extend to 2048 with interest rates ranging for fixed rate debt from 1.85% to 5.75%. It is worth noting that the two oldest debt issues, the 1998 and 2001 VCBA Notes, totaling $53.2 million are noncallable. (See Fig. 4)

As part of the debt issuance process, the University has sought and maintained credit ratings with Moody's Investor Services and S&P. Currently, the university's debt is rated Aa3 and AA by Moody's and S&P, respectively. These strong ratings reflect outside agencies' positive evaluations of the university's financial health and its ability to repay its obligations.

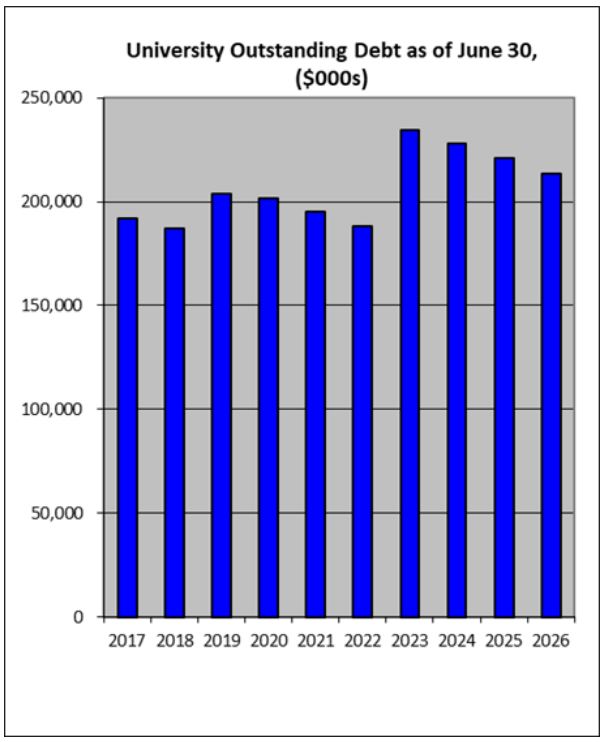

Figure 4

As identified, debt has played a role in our ability to invest in facilities; however, we want to ensure that debt is used responsibly and does not overburden the budget. As such we have had a long-standing debt

policy that identifies a prudent range of debt for the university. With total debt service (principal plus interest payments) at 6.8% of operating expenses, the university falls comfortably within the institutional debt service parameter range of 4% to 10% of operations. As we look at future debt issues, we will continue to remain mindful of the limits created through our debt policy and potential impacts on ratings from S&P and Moody's.

Operating Lease Liabilities: While not a part of the university's debt, the institution has entered into a number of operating leases (primarily related to leases of properties that are used for offices and classrooms) which create a liability valued at $57.2 million as of June 30, 2026. As noted above, there is an offsetting asset of $52.0 million for the "right-of-use" of these leased facilities.

Future Annuity Payments: The split interest instruments mentioned above create a liability based upon expected future payments to the donor. As of June 30, 2026, this liability was recorded at $24.7 million. It is reasonable to assume that the university would welcome an increasing liability in this area, since it would reflect a growing deferred-giving program, which would lead to greater financial support in the future.

Postretirement Benefits: Finally, the university has maintained a postretirement health benefits plan for those employees who serve 10 years or more and retire from the university. This commitment creates an annual expense for the program as well as a future obligation. This obligation, as actuarially calculated, now stands at $21.0 million, up slightly from $19.8 million a year ago. This benefit is expensed annually through operations and the plan is not funded. The university altered this plan for employees hired after April 1, 2003, to shift to a defined contribution plan for employees rather than a defined benefit plan. This will lead to a lowering of this obligation over the very long-term.

Net Assets

In the corporate world, assets minus liabilities reveal the enterprise's equity. Within higher education, this "equity" is referred to as net assets which are further broken down into two components: Without Donor Restrictions and With Donor Restrictions.

Without Donor Restrictions: These funds can be expended if necessary, and as such, they carry the greatest level of flexibility for the university to meet its long-term obligations. The build-up of these funds results from operating surpluses, the creation of quasi-endowments from large unrestricted gifts (105 such endowments today), investment returns and the development of reserves over the years. The university saw this class of net assets grow by 8.3% to $437.3 million, an increase of $33.4 million from the prior year.

With Donor Restrictions: These funds are comprised of assets that act as endowment or are fully expendable but restricted by a purpose or timeframe for use through a donor and include split-interest agreements. The majority of these assets reside in the university's endowment (1,458 individual endowment accounts) and Trusts Held by Others (34 such instruments). The value of this net asset component increased in 2025-26 from $2.15 billion to $2.42 billion. The increase resulted from returns for the year as well as new gifts and pledge payments made in the 2025-26 year.

Table 1 summarizes the university's Statement of Financial Position.

Table 1

Summary Statement of Financial Position June 30, 2026 ($000s)

Total Net Assets	2,856,816
Total Liabilities and Net Assets	$ 3,186,409

Operating Results

For Washington and Lee, this strong financial base is critical in helping faculty and staff deliver a high quality education and student experience. While endowment resources make an enormous contribution to the revenue stream of the university, they are not the only revenues available to the university as depicted in Figure 5.

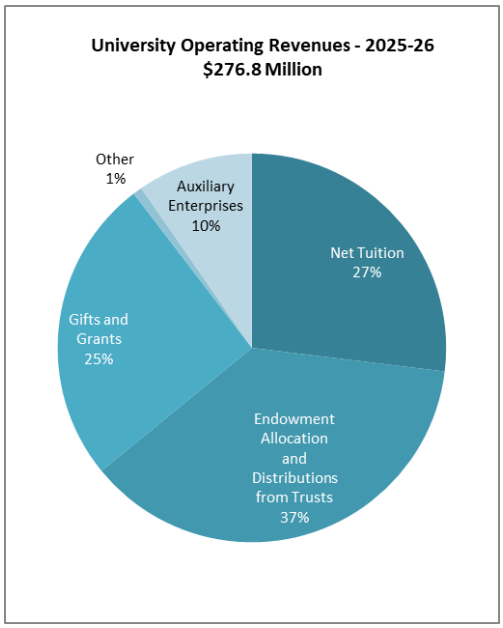

Figure 5

Tuition remains a vital source of operational support; however, it is important to understand the context around costs, stated tuition and fees and net tuition and fees. In 2025-26, the university incurred a cost on average of $108,556 per undergraduate student for educational and student services. The stated tuition and mandatory fees, including full room and board, were $90,970 and the average tuition and fees paid by families after scholarships and grants was $47,776. Every student received a subsidy toward their education of $17,616, and for 61.1% of the population, the subsidy was expanded through financial aid. This is the financial value proposition of a W&L education and has been and will continue to be an area of focus as the University works to expand accessibility to all qualified applicants without regard to socio-economic status.

In 2025-26, net tuition revenues increased by 4.2% to $74.6 million. This increase is largely attributable to higher than expected enrollments as well as lower growth in financial aid even with the need-blind admissions policy. An endowment gift from Bill Miller '72 in 2024-25 ensures that all future undergraduate classes will be admitted under a need-blind admissions

policy going forward allowing for every student to be admitted based on their qualifications and interests rather than an ability to pay. As we look forward, we would anticipate as we achieve that goal, net tuition revenues will become less significant as a revenue source while endowment payout will become a more significant factor as a source of revenue.

Table 2 outlines the operating results for the year.

Table 2

Summary Statement of Activities June 30, 2026 ($000s)	
Revenues:	
Tuition and Fees (net of $78,420 for student financial aid)	74,562
Endowment Return Allocated to Operations	80,759
Income from Funds Held in Trust by Others	22,080
Contributions and Grants	70,556
Auxiliary Enterprises (net of $8,135 of aid)	26,717
Other	2,109
Total	**276,783**
Expenses:	
Instructional	103,976
Academic Support	39,184
Student Services	22,489
Institutional Support	33,759
Auxiliary Enterprises	37,528
Total	**236,936**
Operating Surplus	39,847
Increase in Net Assets from Non-Operating Activities	261,744
Change in Net Assets	**$ 301,591**

In reading the university's operating results, one must look at three pieces to understand the full commitment to Financial Aid at the University. Within revenues, Financial Aid is shown as a reduction of tuition ($78.4 million); this is also the case with Auxiliary Enterprise revenues which reflect an aid discount of $8.1 million. Finally, within the Academic Support expenses, there is $8.3 million of Financial Aid expense (this amount represents awards that exceed tuition, room and board). On a combined basis, student financial aid awarded by the university in 2025-26 was $94.9 million reaching 61.1% of the undergraduate student population and over 90% of law students.

Endowment distributions, whether from the defined payout formula or allocations from Trusts Held by Others, accounted for 37.2% of the operating revenues in 2025-26, at $102.8 million. The drop in 2025-26 as percent of revenue is the direct result of the extreme growth in Contributions in operating revenues, especially those with donor restrictions. This source has grown in importance as a portion of the revenue stream (See Fig. 6). As a result, diligence in management of the underlying assets and considerations of payout allocation models are as important, if not more important, than a decade ago. The formula for determining payout was modified to a "hybrid" formula to take effect in the 2025-26 year which should yield more predictable and steadier long-term growth in endowment payout over time.

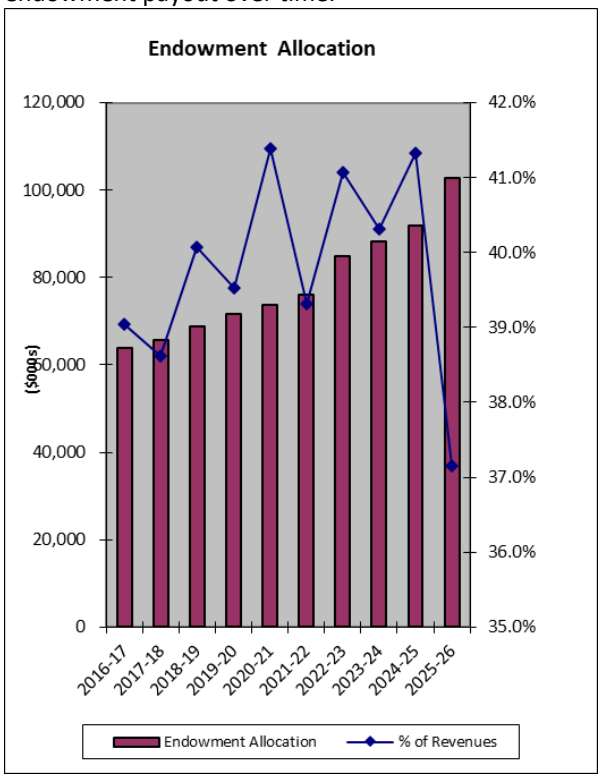

Figure 6

Current gifts and grants also play a significant role in the university's ability to provide a robust and vibrant educational program. For instance, in 2025-26, the W&L

Fund yielded a $11.7 million result, an all-time high for the fund. This comes at a time when annual funds across the country are facing headwinds and declines in giving. The year was highlighted by undergraduate alumni, parents and friends of the university each surpassing their respective goals. With the public phase of the Campaign, *Leading Lives of Consequence*, at full-speed, the 2026-27 W&L Fund is expected to continue to build on this momentum Beyond the W&L Fund, W&L was the beneficiary of a number of unrestricted bequests as well as sizable gifts with donor restrictions in 2025-26. In the latter group, the majority of these were restricted to specific building projects on campus. In the aggregate, Washington and Lee received $70.6 million in expendable contributions and grants in 2025-26 to underwrite operations. If the University had to rely on its endowment to generate the same level of contribution, the university would need an additional $1.41 billion in endowment funds.

We use these resources to fulfill our core mission – education. As demonstrated in Fig. 7, Instruction and Academic Support (libraries, information technology services, etc.) comprise 60.4% of total expenses. Fig. 7 also demonstrates that only 14.2% of expenditures go toward administration, including fundraising. As in past years, comparisons of expenses within the Top-25 liberal arts colleges reveal that Washington and Lee consistently spends a higher percentage of its budget for educational expenses than the peer average (60.1% versus 50.5%). The university's aggregate expenses per student, however, fall below the average expense per student of the peers by $10,031.

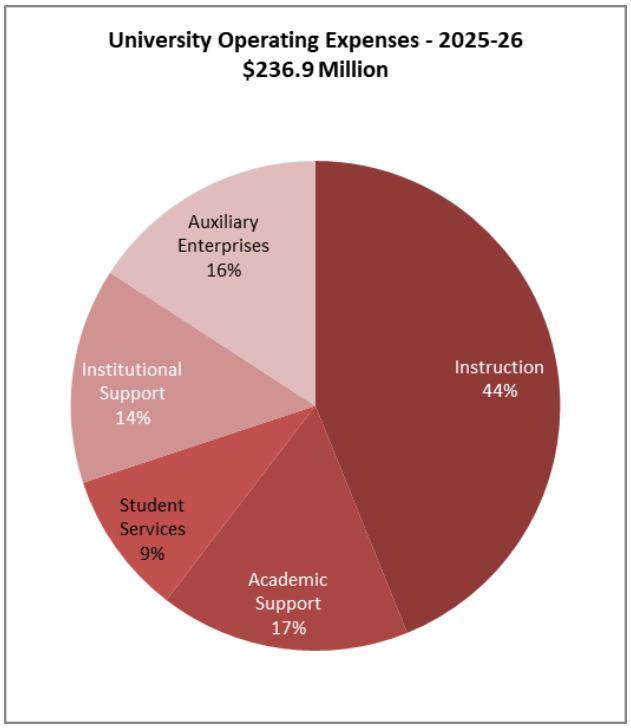

Figure 7

It is also worth noting that this operational efficiency has been affirmed by following the methodology outlined by the American Council of Trustees and Alumni report entitled *How Much is Too Much? Controlling Administrative Costs through Effective Oversight*. In that report, the researchers used a methodology of dividing Institutional Support expenditures by the total of Instruction and Academic Support expenditures. This method led to a ratio as a way to compare schools. For fiscal year 2024-25 (the most recent with comparative information), Washington and Lee posted a ratio of 0.237. This was the third lowest among the Top-25 liberal arts institutions as defined by U.S. News where the mean of the group was 0.345. For W&L, this ratio has decreased slightly to .236 for fiscal year 2025-26.

Results from Operations reflect an operating surplus of $39.8 million versus an operating deficit of $3.75 million in 2025. This swing from deficit to surplus reflected strong revenue growth across the board, but especially

so with Contributions including $48.9 million in Contributions with Donor Restrictions. With strong endowment returns and a revised payout formula that generates more predictable results, the administration anticipates that operating results will continue to be strong going forward even with the unpredictable nature of contributions from one year to the next. The administration has been tasked with moderating growth in expenses while recognizing that investment in people will continue to be critical to the delivery of the highest quality of curricular and co-curricular offerings.

As we have examined the construction of the operating budget, one area that we recognize as not yet an industry best practice is the lack of budgeting for depreciation. This results in the operating budget utilizing a modified cash flow approach rather than GAAP reporting as required in the audited financial statements. This budgeting approach excludes a depreciation expense of $22.94 million but does include principal payments on debt and the annual allocation to capital projects. The administration has worked with the Board of Trustees to implement a practice to better sustain capital renewal over the long-term with additional dollars to be allocated to capital reserves beginning in 2027. In addition, the university will continue to focus on significant fundraising to support specific projects within the capital program as an additional source of funding and believe that the prudent use of debt is appropriate for funding large scale capital investments. We believe that this multifaceted approach to facilities capital management is a reasonable and thoughtful and will strengthen our position to avoid a significant accumulation of deferred maintenance.

Outlook

As we turn attention to 2026-27, the university is in an enviable position with its strongest resource base over its 277 year history. Nevertheless, we still face a number of challenges in the form of continued higher-than-normal inflation and a federal landscape that has altered programs, regulations and created a sense of uncertainty for higher education. As we build out our financial models, we benefit from the strength of the balance sheet, strong student demand and prudent financial management over many years. These allow us to meet these challenges and continue to offer a curricular and co-curricular program to our students that remains the envy of most in higher education.

With our continued focus on the implementation of the strategic plan and the capital campaign to support it, we will ensure the continued sustainability of the institution as one of the premier institutions in higher education. We operate with a tried-and-true objective of investing meaningfully in the future of our faculty and students. This core objective has led to an institution that understands its role and place in higher education and remains committed to providing long-term value to its students and alumni. This is reflected in the financial statements: an endowment per student that few other institutions can boast; a financial aid program that expands access for the most deserving students; an academic program that continually enhances curricular engagement; and ongoing efforts to help students not only succeed but thrive as responsible global citizens.

Independent Auditors' Report

The Board of Trustees
The Washington and Lee University

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of The Washington and Lee University (the University), which comprise the statement of financial position as of June 30, 2026, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the University as of June 30, 2026, and the changes in its net assets and its cash flows for the year then ended in accordance with U.S. generally accepted accounting principles.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the University and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the University's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

KPMG LLP, a Delaware limited liability partnership, and its subsidiaries are part of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the University's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Other Information Included with the Annual Financial Statements

Management is responsible for the other information included in the annual financial statements. The other information comprises the management's discussion and analysis of the financial statements but does not include the financial statements and our auditors' report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Report on Summarized Comparative Information

We have previously audited the University's 2025 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated October 28, 2025. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2026, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Split interest agreement obligations		1,600	(1,724)
Postretirement benefit obligations		1,206	478
Net cash and cash equivalents used in operating activities		(69,039)	(67,078)
Cash flows from investing activities:			
Purchases of land, buildings, and equipment, including interest capitalized		(33,227)	(48,893)
Purchases of investments restricted to land, buildings, and equipment		(37,386)	(8,488)
Proceeds from sale of investments		447,724	474,291
Purchases of investments		(392,274)	(402,750)
Net cash and cash equivalents (used in) provided by investing activities		(15,163)	14,160
Cash flows from financing activities:			
Principal payments on capital lease obligations		(60)	(208)
Interest and dividends restricted for long-term investment		708	640
Proceeds from contributions restricted for long-term investment in endowment and plant		93,541	56,883
Payments on split interest agreements		(2,937)	(3,215)
Principal payments on long-term debt		(7,050)	(6,550)
Net cash and cash equivalents provided by financing activities		84,202	47,550
Net decrease in cash and cash equivalents		—	(5,368)
Cash and cash equivalents:			
Beginning of year		—	5,368
End of year	$	—	—
Supplemental disclosure of cash flow information:			
Cash paid during the year for interest, net of amounts capitalized	$	9,062	9,474

Noncash investing and financing activities, in thousands:

At June 30, 2026 and 2025, $120 and $4,700, respectively, of fixed asset purchases were included in accounts and other payables.

A right of use asset and offsetting liability of $9,299 were recognized for a new lease agreement in the year ended June 30, 2026.

See accompanying notes to financial statements.

(1) Description of Organization

The Washington and Lee University (the University) is a private, liberal arts university in Lexington, Virginia. Founded in 1749; it is the ninth oldest institution of higher learning in the nation. The University is named after George Washington, as he gave the school its first major endowment, and after General Robert E. Lee, as a result of his strong leadership as president of the University. The University is comprised of the College, the Ernest Williams II School of Commerce, Economics and Politics, and the School of Law. There are approximately 1,900 undergraduate students and approximately 400 law students.

(2) Summary of Significant Accounting Policies

(a) Basis of Financial Statement Presentation

The financial statements of the University have been prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Items subject to such estimates and assumptions primarily include the fair value of alternative investments, certain real estate holdings, postretirement benefits obligations, estimated useful lives of land and building improvements, buildings and equipment, and valuation of accounts and contributions receivable. Actual results could differ from those estimates.

(c) Classification of Net Assets

Based on the existence or absence of donor-imposed restrictions, the University's net assets have been grouped into the following two classes:

Without Donor Restrictions – Net assets that are not subject to donor-imposed stipulations.

With Donor Restrictions – Net assets whose use is limited by donor-imposed stipulations that either expire by passage of time or can be fulfilled and removed by actions of the University pursuant to those stipulations; or limited by donor-imposed stipulations that neither expire by passage of time nor can be fulfilled or otherwise removed by the University.

The University retains an interest in funds held in trust by others (see note 9) which are classified as net assets with donor restrictions. Annual adjustments to record the University's interest in such trusts at the current market value are also recorded as with donor restrictions in the statement of activities and are, therefore, reflected as with donor restrictions net assets in the statement of financial position.

(d) Summarized Comparative Information

The statement of activities for the year ended June 30, 2026 is presented with certain summarized comparative information for the year ended June 30, 2025 in total but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. GAAP. Accordingly, such information should be read in conjunction with the University's financial statements for the year ended June 30, 2025 from which the summarized information was derived.

(Continued)

(e) Cash and Cash Equivalents

The University considers all highly liquid investments with an original maturity of three months or less to be cash equivalents, except those cash equivalents held by investment managers as part of their long-term investment strategy, which are included in investments.

At times during the year, the University maintains cash balances at financial institutions in excess of Federal Deposit Insurance Corporation limits.

(f) Inventories

Inventories are stated at the lower of cost or net realized value with cost determined on the first-in, first-out basis.

(g) Investments

Marketable equity and fixed income securities are reported at fair value, which is determined using quoted market prices at the reporting date multiplied by the quantity held. The fair values of other investments without a readily determinable fair value, such as hedge fund investments, private equity and venture capital, and real assets (natural resource and real estate investments), are estimated based on the investment's net asset value of shares or units held by the University at the reporting date. The various net asset values, which are used as a practical expedient for fair values, are based on valuations provided by external investment managers, which are reviewed by the University for reasonableness. The fair value of mortgage loans to employees approximates carrying value, which is determined based on the current principal balance. Short-term investments are comprised of short-term fixed income securities valued at fair value determined from public quotations.

Purchases and sales of investments are recorded on the trade date. All investment income is reported in the period earned as revenue with donor restrictions or revenue without donor restrictions depending on donor restrictions or law. The amount of investment income necessary to satisfy the Board of Trustees (the Board) approved spending policy for the endowment fund is included in the endowment returns allocated to operations in the statement of activities. Any excess of income earned over the approved spending amount is retained in the endowment pool.

Except for investments where donors specifically provide otherwise, investments are maintained in a pool. Gifts that are invested in the pool are assigned units of participation in the pool based upon their fair market value on the date of gift and the most recently determined unit market value for the existing units of participation. Subsequent distributions of annual income, based on the spending formula authorized by the Board, of the investment pool are based upon the number of units of participation. Withdrawals are based upon the most recently determined market value of the respective units of participation, which includes both realized and unrealized net gains or losses. The market value of the units of participation is calculated monthly.

Investments are exposed to several risks, such as interest rate, currency, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the University's financial statements.

(h) Funds Held in Trust by Others

Funds held in trust by others represent resources neither in the possession nor under the control of the University, but held and administered by outside fiscal agents, with the University deriving income from such funds. Funds held in trust by others are reported at fair value. The fair values of the assets of funds held in trust by others are determined based upon quoted market prices of the underlying assets held in trust at year end and assumptions regarding future cash flows from the trust. The fair value of the University's share of the assets is reflected in the statement of financial position and the income (including unrealized gains and losses) is recorded in the statement of activities.

(i) Land, Buildings, and Equipment

Land, buildings, and equipment, net, including art properties, are stated at cost at the date of acquisition or fair value at the date of gift, less accumulated depreciation, computed on a straight-line basis over the estimated useful lives of land and building improvements (10–30 years), buildings (30–50 years), and equipment (5–10 years). The University does not recognize depreciation on its art properties because a decrease in economic benefit is not anticipated since the University expects to take the necessary steps to maintain their condition. Interest on borrowings is capitalized from the date of the borrowing until the specified qualifying assets acquired with those borrowings are ready for their intended use or the borrowing is retired, whichever occurs first. Capitalized interest is amortized over the useful life of the qualifying asset.

(j) Split Interest Agreement Obligations

The University is a participating beneficiary in a number of split interest agreements such as charitable remainder trusts and charitable lead trusts. Donors establish and fund a trust with specified distributions to be made to a designated beneficiary or beneficiaries over the trust's term. If applicable, liabilities to beneficiaries associated with these split interest agreements are calculated using the appropriate discount rate at the time they are established. If applicable under U.S. GAAP, liabilities for these split interest agreements are adjusted annually for changes in actuarial assumptions and amortization of the discount to reflect the current market conditions. Upon termination of the trust, the University receives the portion of assets remaining in the trust as specified by the donor.

Charitable remainder trusts, for which the University is not the trustee, are recorded at the fair value of their beneficial interest. The University records revenue for charitable lead trusts, for which the University is the trustee, based on the present value of future cash flows expected to be received by the University. The fair value of the assets held in trust by the University are included in investments and the associated liability, representing the present value of the liability to the donor's estate, is included in split interest agreement obligations in the statement of financial position.

The University also manages gift annuities, which consist of non-trust assets donated to the University in exchange for a fixed payment for a specified period of time. The gift annuities are recognized at fair value when received and included in investments in the statement of financial position. The associated liability is initially calculated at the present value of future cash flows and adjusted in subsequent periods to reflect changes in actuarial assumptions. Liabilities associated with gift annuities are included in split interest agreement obligations in the statement of financial position. The University has estimated the net realizable value of split interest agreement obligations and has concluded the carrying amounts approximate fair value. The discount rates used in calculation of split interest agreements ranged from 0.4% to 10.6% at June 30, 2026 and 2025.

(Continued)

Pooled life income funds are donated funds received by the University and are assigned a specific number of units in the pool. The donor is paid the amount of income earned on the donor's assigned units. Pooled life income funds are recorded at fair value and are included in investments in the statement of financial position. The University's interest is recognized as contribution revenue in the period in which the assets are received by the donor. The difference between the fair value of the assets when received and the revenue recognized is recorded as a liability and included in split interest agreement obligations in the statement of financial position.

(k) Tuition and Fees and Auxiliary Revenue

Revenue from contracts with customers is recognized when control of the promised goods or services is transferred in an amount that reflects the consideration expected to be received in exchange for those goods or services (i.e., the transaction price). Student tuition and fees and auxiliary revenue are recognized as revenue in the statement of activities, net of institutional aid provided to the student, during the fiscal year in which the related academic services are rendered. Student tuition and fees and auxiliary revenue received in advance of services to be rendered are reported as deferred revenue in the statement of financial position. Student financial aid is provided from earnings on restricted funds and certain board-designated endowments, along with gifts and grants dedicated to providing student financial aid. Aid in excess of a student's tuition and fees is reflected as a reduction of auxiliary enterprises. Disbursements made directly to students for living or other costs are reported as an expense.

The composition of net student tuition and fee revenue for the years ended June 30, 2026 and 2025 was (in thousands):

		2026	2025
Undergraduate	$	130,767	121,722
Law		21,619	19,712
Other		596	892
Less student financial aid		(78,420)	(70,769)
Total	$	74,562	71,557

Net auxiliary enterprises revenue consists of the following for the years ended June 30, 2026 and 2025 (in thousands):

		2026	2025
Residence and dining services, net of student financial aid	$	21,859	21,091
Retail operations and other auxiliary services		4,858	4,819
Total	$	26,717	25,910

(l) Recognition and Classification of Gifts

Contributions of cash and other assets, including unconditional promises to give, are recognized as revenue when the gifts are received by the University. Gifts are reported in the appropriate category of net assets in the statement of activities, except contributions that contain donor-imposed restrictions that are met in the same fiscal year. Gifts whose restrictions are met in the same fiscal year as their receipt are reported as contributions without donor restrictions.

The University records gifts of cash and other assets as restricted support if they are received with donor-imposed restrictions or stipulations that limit their use. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, assets with donor restrictions are reclassified to assets without donor restrictions and reported in the statement of activities as net assets released from restrictions.

The University reports nonfinancial gifts as unrestricted support unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted support. For the years ended June 30, 2026 and 2025, the University recognized nonfinancial gifts of $62,000 and $65,000, all of which consisted of equipment and art properties used to support the University's educational programs. The fair value of the contributed nonfinancial assets was determined using appraised values and there were no donor-imposed restrictions.

In the event a donor makes changes to the nature of a restricted gift which affects its classification among the net asset categories, such amounts are reflected as "re-designated funds" in the statement of activities.

Unconditional promises to give that are expected to be collected within one year are recorded on the date of gift at net realizable value, which approximates fair value. The University uses present value techniques to measure the fair value on the date of gift of unconditional promises to give that are expected to be collected in future years. The discount rates used to compute the discounts on those amounts are determined at the time the unconditional pledges are initially recognized and are not revised subsequently. Amortization of the discounts is recorded as additional contribution revenues in accordance with the donor-imposed restrictions on the contributions. Subsequently, an allowance is made for uncollectible contributions based upon management's judgment after analysis of creditworthiness of the donors, past collection experience, and other relevant factors.

Conditional promises to give are not recognized as revenues until such time as the conditions are substantially met.

(m) Functional Expenses

The University has developed and implemented a system of allocating expenses related to more than one function. These expenses are depreciation, interest, and operations and maintenance of plant. Depreciation is allocated by square footage to the functions utilizing the assets. Interest is allocated based on the use of borrowed money in the individual functional category. Allocation of operations and maintenance of plant expenses was determined through a study of departmental uses of the operations and maintenance budget within each functional category.

(n) Operations

The University classifies revenues earned and expenses incurred related to its core missions of teaching, research and scholarship, and investment returns made available for current use as operating revenues or expenses in the statement of activities. All other activities, including contributions restricted by donors or designated for longer term use by the Board, are shown as a component of nonoperating activities.

(o) Taxes

The University has been classified as an organization described under Section 501(c)(3) of the Internal Revenue Code and thus exempt from federal income taxes on activities related to its exempt purpose. The University does not believe that there are any unrecognized tax benefits or costs that should be recorded in the financial statements. Accordingly, no provision for income taxes has been reflected in the financial statements.

(p) Fair Value Measurements

Certain assets and liabilities are reported at fair value in the financial statements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The University utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The University determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

- Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the reporting entity at the measurement date.
- Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

See note 7 for additional information with respect to fair value measurements.

(3) Liquidity and Availability

As of June 30, 2026 and 2025, financial assets and liquidity resources available within one year for general expenditure, such as operating expenses, scheduled principal payments on debt, and capitalized construction costs not financed with debt, were as follows (in thousands):

		2026	2025
Cash and cash equivalents	$	—	—
Accounts and other receivables		4,415	2,096
Contributions receivable		10,257	9,447
Investments		704	2,584
Expected endowment return allocation		80,459	70,884
Total	$	95,835	85,011

None of the assets above are subject to donor or other restrictions that would make them unavailable for general expenditures within one year of June 30, 2026 or 2025, respectively.

In addition, as of June 30, 2026, the University had assets available from restricted financial assets to meet expected construction costs of $39,388,000.

The University's cash flows have seasonal variations attributable primarily to the timing of tuition billing and contributions received. As part of the University's liquidity management, the University maintains access to a $15,000,000 line of credit, all of which is currently available, as disclosed in note 11.

In addition, the University maintains cash balances as part of the investment pool supporting the endowment. At times, the University utilizes internally restricted cash held in the investment pool for short-term liquidity needs. As of June 30, 2026, the University held $30,280,000 of cash and cash equivalents in the investment pool, which is reflected in investments in the statement of financial position.

(Continued)

(4) Contributions Receivable

Contributions receivable, which are reported net of an allowance for uncollectible amounts and a present value discount, are expected to be collected as follows at June 30, 2026 and 2025 (in thousands):

	2026	2025
Less than one year	$ 58,316	73,014
One year to five years	105,428	130,015
Over five years	2,778	5,503
Total contributions receivable, gross	166,522	208,532
Less allowance for uncollectible contributions	(1,538)	(1,914)
Total contributions receivable, net of allowance	164,984	206,618
Discount (rates ranging from 0.55% to 4.50%)	(12,990)	(15,560)
Total	$ 151,994	191,058

(5) Land, Buildings, and Equipment

Land, buildings, and equipment, net at June 30, 2026 and 2025 consist of the following (in thousands):

	2026	2025
Land	$ 6,124	6,124
Land improvements	27,759	27,268
Buildings and improvements	600,324	556,564
Equipment	92,683	85,146
Art properties	5,856	5,745
	732,746	680,847
Less accumulated depreciation and amortization	(368,110)	(344,865)
	364,636	335,982
Construction in progress	23,798	47,121
Total	$ 388,434	383,103

(6) Investments

Most of the University's long-term investments are held in an investment pool. Annuity and life income trusts and certain other investments are maintained separately from the investment pool.

(Continued)

The participation in the pool and ownership of the other investments at June 30, 2026 and 2025 for each class of net asset is as follows (in thousands):

	Without donor restrictions	With donor restrictions	Total
2026:			
Net assets:			
Investment pool	$ 313,814	1,353,963	1,667,777
Annuity and life income	—	49,941	49,941
Other	704	—	704
Investments as of June 30, 2026	$ 314,518	1,403,904	1,718,422

	Without donor restrictions	With donor restrictions	Total
2025:			
Net assets:			
Investment pool	$ 279,911	1,178,062	1,457,973
Annuity and life income	—	52,290	52,290
Other	9,100	—	9,100
Investments as of June 30, 2025	$ 289,011	1,230,352	1,519,363

Investments are comprised of the following at June 30, 2026 and 2025 (in thousands):

	2026	2025
Short-term investments	$ 31,290	74,524
Equities	151,826	151,052
Equity method investments	16,486	6,510
Fixed income	106,739	57,189
Real assets	42,854	40,547
Hedge funds	393	408
Mortgage loans to faculty and staff	53,289	47,900
Multi-Asset Class (see below) *	1,049,960	914,873
Private equity/venture capital	265,585	226,360
Total	$ 1,718,422	1,519,363

* This represents the University's investments in Makena Capital Management, LLC (Makena). Makena's Multi-Asset Class portfolio is diversified across geographies, strategies, and over 130 investment managers.

(Continued)

The following tables summarizes the investment return and its classification in the statement of activities (in thousands):

2026		Without donor restrictions	With donor restrictions	Total
Interest and dividend income	$	2,960	5,920	8,880
Net appreciation in fair value of investments, including investment expenses of $12,907		43,180	192,225	235,405
Total investment return		46,140	198,145	244,285
Less:

Investment return net of amount allocated to operations	$	8,144	53,462	61,606

The University maintains a statement of investment policies and objectives, which is approved by the Investment Committee of the Board of Trustees. The policy, which is reviewed no less than every three years, provides guidance on investment objectives, appropriate investment vehicles, asset allocation and spending policy for the endowment investments. Since 2007, the University has employed Makena to manage the majority of the University's endowment funds. In so doing, the University has delegated the authority for asset allocation and manager selection to Makena, and in the period since the selection of Makena, the University has redeemed holdings from other managers (legacy investments) and placed those funds with Makena. Approximately 84% of the University's endowment funds were held at Makena as of June 30, 2026 and 2025.

(Continued)

Makena utilizes both traditional and nontraditional investment strategies for the implementation of asset allocation. The single investment pooled fund is invested in approximately 130 individual managers across 5 asset classes and over 30 sub-strategies. The portfolio is structured across the asset and sub-asset classes to generate performance in excess of relevant benchmarks while realizing substantially lower volatility than equity markets.

The portfolio as of June 30, 2026 and 2025 was allocated across the following asset classes as follows:

	2026	2025
Equity	38 %	37 %
Real estate	11	12
Private equity	34	34
Fixed income	13	12
Cash	4	5

The University has within its investments, those investments held by the University as trustee that provide payout to named beneficiaries but will ultimately be passed to the University. These funds are held at BNYMellon and are invested primarily across a range of equity indexed products and fixed income indexed products in a more traditional investment approach. The majority of the funds are held in mutual fund products.

The following table summarizes the University's investments reported using net asset value per share, or its equivalent, as a practical expedient to estimate fair value as of June 30, 2026 and 2025, as well as liquidity and funding commitments for those investments at June 30, 2026 (in thousands):

	Net Asset Value		Unfunded commitments	Redemption frequency (if currently available)	Redemption notice period
	2026	2025			
Equities	$ 39,725	45,315	—	*	*
Real assets	38,912	36,626	29,863	*	*
Multi-Asset Class	1,049,960	914,873	1,203	Annual	1 year
Private equity/venture capital	265,585	226,360	149,073	*	*

* These are primarily limited partnerships where distributions are made to investors through the liquidation of the underlying assets. It is expected to take 1–5 years to fully distribute these assets.

(7) Fair Value Measurements

(a) Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of the University's financial instruments.

- Investments and funds held in trust by others: The fair values of marketable equity and debt securities are determined using quoted market prices at the reporting date multiplied by the quantity held. The fair value of mortgage loans to employees approximates carrying value, which is determined based on the current principal balance. Short-term investments are comprised of short-term fixed income securities valued at fair value determined from public quotations. The fair values of funds held in trust by others are determined based upon quoted market prices of the underlying assets held in trust at year end and assumptions regarding future cash flows from the trust.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the University believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

(b) Fair Value Hierarchy

The following table presents assets and liabilities that are measured at fair value on a recurring basis at June 30, 2026 (in thousands):

	June 30, 2026	Fair value measurements at reporting date using			
		Level 1	Level 2	Level 3	NAV[1]
Assets:					
Investments:					
Short-term investments	$ 31,290	31,011	279	—	—
Equities	151,826	112,079	22	—	39,725
Fixed income	106,739	53,497	52,922	320	—
Real assets	42,854	—	3,942	—	38,912
Hedge funds	393	393	—	—	—
Mortgage loans to faculty and staff	53,289	—	53,289	—	—
Multi-Asset Class	1,049,960	—	—	—	1,049,960
Private equity/venture capital	265,585	—	—	—	265,585
Total investments	1,701,936	196,980	110,454	320	1,394,182
Funds held in trust by others	817,867	—	—	817,867	—
Total assets	$ 2,519,803	196,980	110,454	818,187	1,394,182

(Continued)

[1] Certain investments that are measured at fair value using net asset value per share (or its equivalent) as a practical expedient have not been categorized in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

There were no significant transfers between investment levels and there were no purchases or additions to Level 3 assets for the year ended June 30, 2026.

In addition to assets measured at fair value, the University holds investments of $16,486,000 that are accounted for under the equity method. These investments are included in investments on the statement of financial position but are not presented in the table above.

The following table presents assets and liabilities that are measured at fair value on a recurring basis at June 30, 2025 (in thousands):

	June 30, 2025	Fair value measurements at reporting date using			
		Level 1	Level 2	Level 3	NAV[1]
Assets:					
Investments:					
Short-term investments	$ 74,524	74,255	269	—	—
Equities	151,052	105,701	36	—	45,315
Fixed income	57,189	54,848	2,021	320	—
Real assets	40,547	—	3,921	—	36,626
Hedge funds	408	408	—	—	—
Mortgage loans to faculty and staff	47,900	—	47,900	—	—
Multi-Asset Class	914,873	—	—	—	914,873
Private equity/venture capital	226,360	—	—	—	226,360
Total investments	1,512,853	235,212	54,147	320	1,223,174
Funds held in trust by others	716,329	—	—	716,329	—
Total assets	$ 2,229,182	235,212	54,147	716,649	1,223,174

[1] Certain investments that are measured at fair value using net asset value per share (or its equivalent) as a practical expedient have not been categorized in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

There were no significant transfers between investment levels and there were no purchases or additions to Level 3 assets for the year ended June 30, 2025.

In addition to assets measured at fair value, the University held investments of $6,510,000 at June 30, 2025 that are accounted for under the equity method. These investments are included in investments on the statement of financial position but are not presented in the table above.

(8) Endowment

Endowment is a term used commonly to refer to the resources that have been restricted by donors or designated by the Board of Trustees that will be invested to provide future revenue to support the University's activities. As of June 30, 2026, the University holds 1569 endowment funds, of which 1458 are true endowments (restricted by the donor), six are term endowments (restricted by the donor and the principal may be spent) and 105 are quasi-endowments (designated by the Board).

(a) Interpretation of Relevant Law

Based on the interpretation of Virginia's legislation, which incorporates the provisions of the Uniform Prudent Management of Institutional Funds Act (the Act or UPMIFA), by the Board of Trustees of the University, and absent explicit donor stipulations to the contrary, the University classifies the original value of gifts donated to the permanent endowment, as well as accumulations to the permanent endowment made at the direction of the donor, as net assets with donor restrictions.

In accordance with the Act, the University considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds: the duration and preservation of the fund; the purposes of the University and the donor-restricted endowment fund; general economic conditions; the possible effect of inflation or deflation; the expected total return from income and the appreciation of investments; other resources of the University; and the investment policies of the University.

Endowment net assets consist of the following at June 30, 2026 (in thousands):

	Without donor restrictions	With donor restrictions	Total
Donor-restricted endowment funds	$ —	1,348,968	1,348,968
Board-designated endowment funds	327,157	—	327,157
Total endowed net assets	$ 327,157	1,348,968	1,676,125

Endowment net assets consist of the following at June 30, 2025 (in thousands):

	Without donor restrictions	With donor restrictions	Total
Donor-restricted endowment funds	$ —	1,173,550	1,173,550
Board-designated endowment funds	302,351	—	302,351
Total endowed net assets	$ 302,351	1,173,550	1,475,901

Net assets for donor-restricted endowment funds held in perpetuity were $711,193,000 and $666,988,000 as of June 30, 2026 and 2025, respectively.

Changes in endowment net assets for the years ended June 30, 2026 and 2025 are as follows (in thousands):

	Without donor restrictions	With donor restrictions	Total
Endowment net assets, June 30, 2024	$ 294,067	1,079,019	1,373,086
Investment return:			
Investment income	1,483	5,738	7,221
Net appreciation	23,638	91,463	115,101
Contributions and pledge payments	34	51,343	51,377
Appropriation for expenditure	(16,871)	(54,013)	(70,884)
Endowment net assets, June 30, 2025	302,351	1,173,550	1,475,901
Investment return:			
Investment income	1,398	5,963	7,361
Net appreciation	43,682	186,241	229,923
Contributions and pledge payments	45	43,655	43,700
Appropriation for expenditure	(20,319)	(60,440)	(80,759)
Endowment net assets, June 30, 2026	$ 327,157	1,348,969	1,676,126

(b) Funds with Deficiencies

From time to time, the fair value of assets associated with an individual donor-restricted endowment fund may fall below the original value of the fund. Deficiencies of this nature that are reported in net assets with donor restrictions were $2,000 and $568,000 as of June 30, 2026 and 2025, respectively.

(c) Return Objectives and Risk Parameters

The University has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets.

(d) Strategies Employed for Achieving Objectives

To satisfy its long-term rate-of-return objectives, the University relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). The University targets a diversified asset allocation that places emphasis on investments in equities, bonds and absolute return strategies to achieve its long-term return objectives within prudent risk constraints.

(e) Spending Policy and How the Investment Objectives Relate to Spending Policy

The Board-approved spending formula for the endowment provides for spending the lesser of the prior year allocation incremented by a Consumer Price Index-based inflator, 6% of the three-year average of fair values at June 30, or a 5% ceiling related to the June 30 fair value. This model is often referred to as a constant growth spending formula. The applied spending rate was 5% for the years ended June 30, 2026 and 2025.

(9) Funds Held in Trust by Others

The majority of the funds held in trust by others comes from Letitia P. Evans' bequest of 15% of the annual net income of the Lettie Pate Evans Foundation, Inc. Restricted Fund. At June 30, 2026 and 2025, the fair value of the University's interest was reported by the trustees as $767,840,000 and $673,844,000, respectively. During the years ended June 30, 2026 and 2025, the University received distributions of $20,901,000 and $20,156,000, respectively, from the Lettie Pate Evans Foundation, Inc. Restricted Fund.

At June 30, 2026 and 2025, the University maintained an interest in 33 other trusts with fair values of the University's interest, as reported by the trustees of approximately $50,027,000 and $42,485,000, respectively, and received distributions for the years ended June 30, 2026 and 2025 of $1,232,000 and $1,067,000, respectively, including $53,000 and $126,000 that was contributed to the endowment for the years ended June 30, 2026 and 2025, respectively.

(10) Leases

The University determines if an arrangement is or contains a lease at inception of the contract. The right-of-use assets represent the right to use the underlying assets for the lease term and the lease liabilities represent the obligation to make lease payments arising from the leases. Right-of-use assets and lease liabilities are recognized at commencement date based on the present value of lease payments over the lease term. The University uses the implicit rate noted within the contract. If the implicit rate is not readily available, the University uses the risk-free rate corresponding to the term of the lease. A right-of-use asset and lease liability is not recognized for leases with an initial term of 12 months or less and lease expense is recognized for these leases on a straight-line basis over the lease term within operating expenses.

The University has various real estate operating leases for offices that expire in years through fiscal 2050. The terms of these leases vary and certain of these leases provide for increasing rent over the term of the lease. The University's operating leases had a weighted average discount rate of 4.76% and 4.61% and weighted average remaining term of 24.0 years and 23.7 years as of June 30, 2026 and 2025, respectively. The University has a finance lease of equipment that expires in fiscal 2028.

The components of lease expense for the fiscal years ended June 30, 2026 and 2025 are as follows (in thousands):

		2026	2025
Lease cost:			
Operating lease cost	$	4,200	2,484
Finance lease cost:			
Amortization of right-of-use assets		56	56
Interest on lease liabilities		3	14
	$	4,259	2,554

(Continued)

Future minimum lease payments and reconciliation to operating lease liabilities at June 30, 2026 are as follows (in thousands):

	Operating leases
2027	$ 2,507
2028	2,716
2029	2,919
2030	3,034
2031	3,155
Thereafter	90,790
Total	105,121
Less present value discount	(47,956)
Lease liabilities	$ 57,165

(11) Long-Term Debt

Long-term debt consists of the following obligations at June 30, 2026 and 2025 (in thousands):

	2026	2025	Final maturity	Interest rates
Virginia College Building Authority (VCBA):				
1998 Note, includes unamortized premium of $145 and $202, and unamortized debt issuance cost of $74 and $92, respectively (A)	$ 29,501	34,574	January 2031	5.25%
2001 Note, includes unamortized premium of $802 and $905, and unamortized debt issuance cost of $72 and $82, respectively (B)	23,725	23,873	January 2034	5.75%
2023 Note, includes unamortized debt issuance costs of $208 and $219, respectively (C)	52,292	52,481	June 2044	3.90%
Industrial Development Authority of the City of Lexington:				
2018A Note, includes unamortized premium of $2,668 and $2,992 and issuance cost of $249 and $271 (D)	30,005	30,806	June 2048	5.00%
2018B Note, includes unamortized issuance cost of $72 and $77 (E)	15,037	15,034	June 2043	Variable
2019 Note, includes unamortized issuance cost of $237 and $251 (F)	37,473	37,459	January 2043	3.38%
2021 Note, includes unamortized issuance cost of $327 and $343 (G)	25,398	26,652	January 2040	1.85% - 3.00%
	$ 213,431	220,879		

(Continued)

(A) Semi-annual interest payments on this note began July 1, 1998, with annual principal payments commencing on January 1, 2022, and continuing until maturity on January 1, 2031.

(B) Semi-annual interest payments began January 1, 2002, with annual principal payments commencing January 1, 2016, and continuing until maturity in January 2034.

(C) Monthly interest payments paid in arrears began July 1, 2023, with annual principal payments commencing in June 2026, and continuing until maturity in June 2044. As of June 30, 2026, all the proceeds from the issuance of the 2023 Bonds had been spent on construction projects. Unspent proceeds at June 30, 2025, were included in unspent bond proceeds in the statement of financial position.

(D) Semi-annual interest payments and annual principal payments began January 1, 2019 and continuing until maturity in June 2048.

(E) Monthly interest payments began July 2018 with annual principal payments commencing June 30, 2036 and continuing until maturity in June 2043. The interest rates for the year ended June 30, 2026 ranged from 3.54% to 4.13%.

(F) Semi-annual interest payments began July 1, 2020, with annual principal payments commencing January 1, 2034, and continuing until maturity in January 2043.

(G) Semi-annual Interest payments began July 1, 2022, with annual principal payments commencing on January 1, 2023, and continuing until maturity in January 2040.

Aggregate principal payments due for the next five fiscal years are: 2027 – $7,430,000; 2028 – $7,810,000; 2029 – $8,205,000; 2030 – $8,635,000; 2031 – $9,075000; and thereafter – $169,900,000.

Revolving Credit Agreement

The University has a Revolving Credit agreement with Truist Bank that permits the University to borrow through April 20, 2028 up to $15,000,000, bearing interest at an adjusted SOFR rate by adding the one-month SOFR plus one and one-quarter of one percent (1.25%) per annum, which shall be adjusted monthly on the first day of each month. At June 30, 2026, the University had $15,000,000 available under this facility.

(12) Net Assets

Net assets at June 30, 2026 were as follows (in thousands):

		Without donor restrictions	With donor restrictions	Total
Operations	$	(20,885)	32,007	11,122
Student loan funds		—	6,689	6,689
Net investment in plant		149,424	—	149,424
Physical plant acquisitions		—	39,388	39,388
Quasi endowment funds		327,157	—	327,157
Donor restricted endowment		—	1,348,968	1,348,968

(Continued)

Net Assets Released from Restrictions

Net assets are released from donor restrictions when expenses are incurred to satisfy the restricted purposes or by occurrence of other events as specified by donors. Purpose restrictions accomplished during the year ended June 30, 2026 were as follows (in thousands):

Operations:		
Financial aid	$	4,371
Program support		6,653
Other		1,768
Net investment in plant		997
		13,789
Nonoperations:		
Net assets released for fixed asset acquisitions		18,434
Total	$	32,223

(13) Expenses

Expenses for the year ended June 30, 2026 were incurred for the following (in thousands):

	Salaries, wages and benefits	Supplies and services	Cost of sales	Deprecation and amortization	Interest	Total operating expenses	Net periodic postretirement benefit cost excluding service cost	Total expenses by function
Instruction and research	$ 73,559	16,779	—	11,082	2,556	103,976	—	103,976
Academic support	21,135	15,465	—	2,324	260	39,184	—	39,184
Student services	14,908	5,080	—	1,312	1,189	22,489	—	22,489

(14) Postretirement Benefits

The University currently provides health insurance in the form of a retiree medical benefit (the Plan) to certain retired employees and their dependents. The costs of postretirement benefits are accrued during the service lives of employees. Employees of record prior to April 1, 2003 are eligible to qualify for this benefit. Those hired on or after April 1, 2003 cannot participate in the Plan. The Plan is unfunded.

The components of net periodic postretirement benefit cost for the years ended June 30, 2026 and 2025 were as follows (in thousands):

	2026	2025
Service cost (benefits attributed to employee service during the year)	$ 486	568
Interest cost on accumulated postretirement benefit obligation	997	998
Amortization of prior service cost	—	(79)
Net periodic postretirement benefit cost	$ 1,483	1,487

The amortized actuarial gain or loss results from changes in certain assumptions and will be amortized over a period based on the average future service of participants expected to receive plan benefits.

The discount rate used in determining the accumulated postretirement benefit obligation (APBO) as of June 30, 2026 and 2025 was 5.26% and 5.25%, respectively. The assumed health care cost trend used in measuring the accumulated postretirement benefit obligation was 6.50% in 2026, decreasing to 5.00% over the next ten years for Pre-65 retirees and 6.00% in 2026, decreasing to 5.00% over the next ten years for Post-65 retirees.

(Continued)

The following information summarizes activity in the unfunded postretirement benefit plan for the years ended June 30, 2026 and 2025 (in thousands):

		2026	2025
Change in benefit obligation:			
Accumulated benefit obligation, beginning of year	$	19,768	19,289
Service cost		486	568
Interest cost		997	998
Actuarial gain		1,426	607
Net benefits paid		(1,703)	(1,694)
Accumulated benefit obligation, end of year	$	20,974	19,768
Amount not yet recognized in net periodic benefit cost and included in net assets without donor restrictions:			
Net actuarial gain	$	(376)	(1,802)
Prior service cost		—	—
	$	(376)	(1,802)

Projected postretirement health benefits expected to be paid in each of the next five fiscal years are: 2027 – $2,548,000; 2028 – $2,381000; 2029 – $2,366,000; 2030 – $2,366,000; and 2031 – $2,105,000. An additional $9,073,000 is expected to be paid for the fiscal years 2031 through 2035.

Total employer and participant contributions are $1,703,000 and $165,000, respectively, for the year ended June 30, 2026. Total benefits paid for the year ended June 30, 2026 are $1,868,000. Total employer and participant contributions are $1,694,000 and $163,000, respectively, for the year ended June 30, 2025. Total benefits paid for the year ended June 30, 2025 are $1,857,000. The expense discount rate for the years ended June 30, 2026 and 2025 were 5.26% and 5.25%, respectively.

(15) Commitments

The University's contractual commitments for capital expenditures totaled approximately $5,624,000 at June 30, 2026, and are comprised of the following (in thousands):

Building Construction and Major Renovations	$	4,484
Facilities Maintenance		1,140
	$	5,624

(16) Concentration Risk

Financial instruments that potentially subject the University to concentration of risk consist primarily of an equity investment in a large U.S. company. This investment comprised 30% and 32% of total funds held in trust by others for the periods ended June 30, 2026 and 2025, respectively.

(17) Contingencies

The University receives revenues under U.S. Government grants and contracts. The ultimate determination of amounts received under these programs generally is based upon allowable costs, which are subject to audit, and are reported to the U.S. Government. Recovery of indirect costs is based on predetermined rates negotiated with the government. The University is of the opinion that adjustments, if any, arising from such audits will not have a material effect on the financial statements.

From time to time, the University is involved in various legal proceedings which are in the normal course of operations. In management's opinion, the University is not currently involved in any legal proceedings which individually or in the aggregate could have a material effect on the financial condition, change in net assets and/or liquidity of the University.

(18) Related-Party Transactions

Members of the Board and senior management may, from time to time, be associated, either directly or indirectly, with companies doing business with the University. The University has a written conflict-of-interest policy that requires annual disclosures from members of the Board, senior management, and other designated employees of any actual or potential conflicts of interest, including business or employment relationships or significant financial interests in businesses with which the University conducts business. No such relationships have been disclosed that are considered to be material to the financial statements.

Additionally, certain gifts and pledges to the University are received annually from Board members. All such business activities are conducted in accordance with the University's normal business practices.

Mortgage loans due from faculty and staff of $53,289,000 and $47,900,000 as of June 30, 2026 and 2025, respectively, are included within investments on the statement of financial position.

(19) Subsequent Events

The University has evaluated subsequent events for potential recognition and/or disclosure in the June 30, 2026 financial statements through October 23, 2026 the date the financial statements were issued.
